

WHO WE ARE

20+ Partners:

Environmental conservation, outdoor recreation, and other non-governmental organizations

8+ Members: Agencies and governmental organizations, including Allegheny County, DCNR, Southwestern PA Commission, PennDOT and more

Staff: Loralyn Fabian, Coordinator

GIS Consultants

OUR VISION

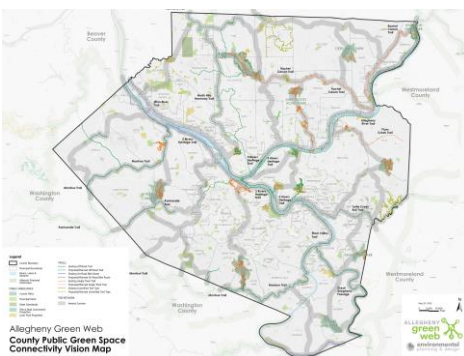

“The Allegheny Green Web envisions a future where all communities within Allegheny County are more livable, healthy, prosperous and environmentally sound, through an interconnected, public trail and green space system.”

OUR GOALS

- Develop a network of publicly accessible trails and green spaces that connect the County and Municipal parks with each other, and to neighboring communities
- Create diverse types of outdoor experiences and modes for people powered outdoor travel
- Ensure access and opportunity for all residents in the County through an equitable distribution of public trails and green space connections
- Build communication among residents, municipalities, and interested organizations about public trail and green space connections

WHAT WE AIM TO DO

Through **organizing, planning, advocacy, and storytelling**, the Allegheny Green Web coalition will aim to connect the Allegheny County parks, municipal parks, and conservation lands with each other, and to neighboring communities.

Above: The Allegheny Green Web has been developing and gaining municipal input on an emerging Public Green Space Connectivity Vision map.
